

Instructions:

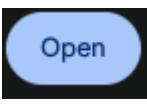

1. Click the “Mods” Link to download the mods as “mods.zip”

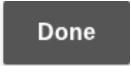

2. Open the files application from your sidebar:
3. Double click on “mods.zip”. This should open it up but ignore it right now and move on to the next step
4. Open the game “Moddable 1.8.8”. It might take a second to open
5. Once it opens, you should be met with a mod menu:

6. Press the **Upload Mod (.js)** button

7. Select  then select 

8. Select the mod you want to add, then press 
9. Repeat step 6-8 until you have added all the mods you want
10. IMPORTANT: close that tab and reopen the game

11. Make sure your mods are still selected, then press 
12. Play minecraft

Note: If you want to edit your mods again, then in-game press the “esc” key, then press the “Options” button, then press the “Mods” button in the bottom left corner. Edit the mods, then reopen the game
